General Revenue funding for internal auditors (will utilize two existing positions) to more efficiently complete financial and performance auditing required by statute, and retain a productive auditing program. Fulfilling one of the statutory requirements with current audit staff and third-party audit appropriation is not possible. Also, based upon increased state receipts of federal and general revenue funding, the need for internal audit services is expected to grow. DNR auditors are more familiar with the performance of our programs, the financial aspects of their audit, and the regulatory requirements than a third-party audit firm.

General Revenue funding to support a risk manager position in the agency. Our team members are located and travel throughout the state in facilities, in the field, and in state parks. They face risks while, for example, operating heavy equipment and responding to various emergencies. Our visitors and customers will benefit from an increased team member focus on Emergency Management, as it encompasses prevention, mitigation, preparedness, response, and recovery as implemented in a risk management plan. The risk manager will evaluate specific risks, facilitate mitigation plans, and ensure proper response and recovery efforts are in place. This position will manage DNR's emergency notification system and serve as liaison for statewide risk management.

The department received general revenue funding (FY 2023 and FY 2024 budgets) to partially support the statewide pay plans effective March 1, 2022 and March 1, 2023. That funding did not have FTE associated with it. To appropriately reflect the FTE accrual with the adjusted salary, the department is requesting to move 57.95 FTE authority from Federal and Other funds to General Revenue through core reductions in the various operating core budgets and a corresponding new decision item here.

In FY 2024, the General Assembly appropriated \$108.6 million in General Revenue (GR) and Budget Stabilization Funds (BSF) toward twelve projects related to drinking water, wastewater, stormwater, levee, bridge, nursing facility sewer improvements, and greenway development capital infrastructure projects across the state. This request seeks reappropriation of \$82.4 million for project authority in HB 6 (these were identified as one-times in the FY 2024 budget), as well as administrative funding to manage these multi-year projects in HBs 6, 19, and 20 (non-ARPA) until project funding has been fully expended.

The Missouri Fertilizer Control Board recently issued a new determination that certain wastewater and other process wastes would no longer qualify for fertilizer licenses. DNR had permit exemptions for approximately 150 materials based on these licenses. These materials will now need to be covered under a new permit, or by modifying an existing permit, to authorize continued land application of these process wastes.

The department received general revenue funding (FY 2023 and FY 2024 budgets) to partially support the statewide pay plans effective March 1, 2022 and March 1, 2023. That funding did not have FTE associated with it. To appropriately reflect the FTE accrual with the adjusted salary, the department is requesting to move 57.95 FTE authority from Federal and Other funds to General Revenue through core reductions in the various operating core budgets and a corresponding new decision item here.

Book 1, Page 89

**Description:** Water Quality Studies: – Grants or contracts are provided to regularly monitor approximately 10% of the state’s classified waters. Data collected through these monitoring efforts is used to assess, protect and restore the quality of Missouri Waters. Additionally, the department funds studies to evaluate a public water supply system for the purpose of developing an engineering report that will make recommendations for updating and upgrading the system’s infrastructure; and to determine the most appropriate course of action for a small public water supply system to take to protect and maintain the quality of the source of its water and to ensure the citizens are consistently provided with clean water that is safe to drink. Drinking Water Analysis: – This section provides for the testing of water samples taken from Missouri’s 1,425 community and 1,304 non-community water systems. Samples are tested by the DNR lab or through contractual agreement with an outside lab. Testing for the presence or absence of contamination is necessary to comply with the federal drinking water regulations.

**Legal Basis:** State Statutes 640.400 – 640.620 (Water Resource Law) RSMo; 640.100.3 Water Testing Required

**Funding Source:** Federal Funds (0140), NRP Fund - Water Pollution Permit Fee (0568), & Safe Drinking Water Fund (0679)

Book 1, Page 283

**Description:** The Department coordinates state, federal and local efforts during an environmental emergency, including the coordination of controlled substances cleanup (i.e.: meth labs) and ensures that the emergency is brought to a safe and environmentally sound conclusion. Many incidents require on-scene response and may require a contractor to be called in to eliminate threat to public health and the environment if a responsible party cannot be located or fails to take timely action. Emergency response encompasses hazardous substance releases, radiological incidents, homeland security events, weapons of mass destruction, and natural disasters.

**Section 6.290 – Missouri Geological Survey Operations**

Book 2, Page 341

**Description:** The Missouri Geological Survey (MGS), headquartered in Rolla, MO, includes the Geological Survey Program, Land Reclamation Program and Water Resources Center. The Geological Survey Program provides geologic and hydrologic information and expertise to assist with decisions relating to economic development, site remediation, containment migration, subsurface investigations and geologic hazards, determines the character and availability of the state's energy and mineral resources and implements the Water Well Drillers' Act. The Land Reclamation Program issues permits, conducts inspections and enforces mining laws for industrial minerals, metallic minerals and coal resources. The program also oversees the reclamation of abandoned mine sites in Missouri. Water Resources Center staff provide information for Missouri's comprehensive water needs by examining both surface and groundwater use and availability. They administer the provisions of the Missouri Dam and Reservoir Safety Law; regulating all nonfederal, nonagricultural dams 35 feet and higher through inspections, registration and issuance of construction permits. Staff also investigate water supply issues; maintain and update Missouri's Public Water Supply database for groundwater wells; collect, analyze and distribute groundwater-level data from a statewide network of observation wells; evaluate public water supply wells; and provide casing and total depth specifications. Water Resources Center staff continue to provide guidance and technical expertise for planning and development of regional water supply projects throughout Missouri, as well as defend the state's vital water resources interests, including those related to river transport, before numerous interstate and interagency river basin associations.

Federal authority is required to manage the extraordinary increase of coal mine site reclamation projects made possible by approximately \$5.8 million per year for the next 15 years authorized in the Bipartisan Infrastructure Law. Reclamation includes closing unsafe mine shafts, eliminating dangerous high walls, improving severely impacted land, and stabilizing subsiding ground beneath homes and roads.

The department received general revenue funding (FY 2023 and FY 2024 budgets) to partially support the statewide pay plans effective March 1, 2022 and March 1, 2023. That funding did not have FTE associated with it. To appropriately reflect the FTE accrual with the adjusted salary, the department is requesting to move 57.95 FTE authority from Federal and Other funds to General Revenue through core reductions in the various operating core budgets and a corresponding new decision item here.

Book 2, Page 357

**Description:** This section provides for the transfer of General Revenue to the Multipurpose Water Resource Program Fund, Multipurpose Water Resource Program, and State Water Plan. The Multipurpose Water Resource Program fund is intended to support development of public water supply, flood control storage, and treatment and transmission facilities. The Multipurpose Water Resource Act (Sections 256.435 - 256.445, RSMo) authorizes the Department to administer moneys appropriated to the fund through provision of grants or other financial assistance and allows for the state to participate with a sponsor in the development, construction, or renovation of a water resource project providing a long-term solution to water supply needs. This appropriation is also used for professional services to implement the State Water Plan and advance the Department's efforts and responsibilities to ensure that the availability of water resources supports Missouri's current and future beneficial uses and is not a limiting factor in economic growth. The primary areas of this effort include water supply availability, drought response and watershed feasibility studies, and addressing interstate water needs.

**Section 6.305 – Mined Land Reclamation and Studies**

Book 2, Page 363

**Description:** The Land Reclamation Program, under the direction of the Missouri Mining Commission, oversees the reclamation of abandoned mine sites in Missouri. This includes sites abandoned prior to 1977 and sites where permits were revoked and reclamation bonds were collected. For coal sites abandoned prior to 1977, the program utilizes federal funds from the Office of Surface Mining, US Department of Interior to directly contract for the reclamation activities at these sites. This program is known as the Abandoned Mine Land (AML) program. Where bonds have been forfeited on permit-revoked mine sites, the Mined Land Reclamation Fund (MLRF) PSD provides appropriation authority for reclamation of these bond forfeited sites. Reclamation involves work to restore mined lands to productive uses such as agriculture, wildlife or development. The program may collect the reclamation bonds and directly contract for the reclamation activities or the program may allow the surety bond holder to perform the reclamation in the place of the original permit holder. Federal funding also allows for grants to small coal operators (<300,000 tons/year). There is one active coal operator in Missouri that qualifies for this assistance should the company decide to expand operations and require an additional permit.

**Legal Basis:** Surface Mining Control and Reclamation Act of 1977, Public Law 95-87 (30 CFR Part 700.01-955.17); State Statutes 444.140, 444.368, 444.778 (Bonds); 444.960 – 444.965 (Fees for Coal Mine Land Reclamation Fund); 444.760 – 444.790 (Land Reclamation Act); 444.800-444.970 Surface Coal Mining Law

**Funding Source:** Federal Fund (0140) & Mined Land Reclamation Fund (0906)

Book 2, Page 369

**Description:** This section provides for expenditures of forfeited surety bonds for improperly abandoned oil and gas wells. Some of these wells have the potential to impact surface and groundwater resources. If a producer fails to properly close the wells at the conclusion of operations, the state has the ability to claim the bond and use the funds to properly plug the wells. Revenues of the fund are also used to handle emergency situations as they arise, such as a leaking gas well.

The department received general revenue funding (FY 2023 and FY 2024 budgets) to partially support the statewide pay plans effective March 1, 2022 and March 1, 2023. That funding did not have FTE associated with it. To appropriately reflect the FTE accrual with the adjusted salary, the department is requesting to move 57.95 FTE authority from Federal and Other funds to General Revenue through core reductions in the various operating core budgets and a corresponding new decision item here.

The Division of Energy expects to receive \$2.7 million in formula funding through the Inflation Reduction Act (IRA) of 2022 State-Based Home Energy Efficiency Contractor Training Grant (CTG) Program. Energy will establish its CTG program as pass-through funding to existing eligible training providers in the State of Missouri. An increase in the number of trained, certified, skilled workers will be needed to fill vacancies and meet demand in Missouri's energy efficiency workforce. Funds will be used to provide training and support services to workers and businesses to deliver the influx of new federally-funded energy efficiency and electrification programs.

**Section 6.350 – Missouri State Parks Operations**

Book 2, Page 561

**Description:** This section provides general management and planning for Missouri's 88 State Parks and Historic Sites plus the Roger Pryor Pioneer Backcountry. These state parks and historic sites are scattered throughout the state, each containing unique and diverse natural and cultural resources. The park system also includes five district offices and five support programs. In addition, the division provides law enforcement services and protection to park visitors, their property and the cultural and natural resources of the division. The mission of the division is to preserve and interpret the state's most outstanding natural features, to preserve and interpret the state's most outstanding cultural landmarks; and to provide compatible recreational opportunities in these areas. This core also includes pass through appropriation authority for Missouri State Parks: Bruce R Watkins, Payment in Lieu of Taxes, Gifts to State Parks, State Parks Resale, Concession Default, State Park Grants, and Outdoor Recreation Grants. State Parks and Historic Sites are supported by the Park Sales Tax, a one-tenth of a cent sales tax which has been adopted by the voters of Missouri five times. One-half of the sales tax proceeds support Missouri's State Parks and Historic Sites. Park Sales Tax funds are limited to expenditures on "the acquisition, development, maintenance and operation of state parks and state historic sites in accordance with Chapter 253, RSMo, and for the administration of the laws pertaining thereto." The most recent 2016 election reauthorized the sales tax until a general election is held in 2026 or at a special election to be called by the governor for that purpose...

Allows Missouri State Parks to fulfill its agreed to responsibility of monitoring and maintaining the nearly completed remediated areas of St. Joe State Park that had elevated lead levels resulting from historic mining operations. Compliance with EPA requirements include erosion control measures to prevent exposure to maximum level of lead allowed in recreational areas and requires significant amounts of aggregate to cover the trail network and maintain storm water control structures.

That funding did not have FTE associated with it. To appropriately reflect the FTE accrual with the adjusted salary, the department is requesting to move 57.95 FTE authority from Federal and Other funds to General Revenue through core reductions in the various operating core budgets and a corresponding new decision item here.

This core also includes pass through appropriation authority for Missouri State Parks: Bruce R Watkins, Payment in Lieu of Taxes, Gifts to State Parks, State Parks Resale, Concession Default, State Park Grants, and Outdoor Recreation Grants. State Parks and Historic Sites are supported by the Park Sales Tax, a one-tenth of a cent sales tax which has been adopted by the voters of Missouri five times. One-half of the sales tax proceeds support Missouri's State Parks and Historic Sites. Park Sales Tax funds are limited to expenditures on "the acquisition, development, maintenance and operation of state parks and state historic sites in accordance with Chapter 253, RSMo, and for the administration of the laws pertaining thereto." The most recent 2016 election reauthorized the sales tax until a general election is held in 2026 or at a special election to be called by the governor for that purpose...

### Section 6.355 – Historic Preservation Office

Book 2, Page 627

**Description:** The State Historic Preservation Office (SHPO) works with citizens and groups throughout the state to identify, evaluate, and protect Missouri's diverse range of historic architectural and archaeological resources. That funding did not have FTE associated with it. To appropriately reflect the FTE accrual with the adjusted salary, the department is requesting to move 57.95 FTE authority from Federal and Other funds to General Revenue through core reductions in the various operating core budgets and a corresponding new decision item here.

The Environmental Improvement and Energy Resources Authority (EIERA) expects to receive \$41 million of Inflation Reduction Act (IRA) funding for the five-year U.S. Environmental Protection Agency (EPA) Solar for All grant program to provide forgivable and low-interest loans for energy-efficiency building upgrades, solar equipment, and workforce training. Prioritizing multifamily housing and utility supported solar will help reach low-income communities, enabling shared resources, cost-sharing benefits, economies of scale, and other sustainability opportunities. This is a collaboration with the City of Springfield, the City of St. Louis, Kansas City, Columbia, Joplin, multiple counties, and other local organizations that could total up to \$250 million.

Beginning September 1, 2008, the Board reduced the transport load fee from \$40/load to \$20/load. Second, the Board sets a one-time fee of one hundred dollars per tank from each participant who wished to obtain insurance from PSTIF for the first time. Third, the Board sets an annual fee from each participant in the program of at least one hundred dollars per year but not more than five hundred dollars per year.
